# Responsibility of Youth

Neeraj Chaturvedi\*

## Abstract

*The term 'responsibility' means doing the allow work perfectly. Youth means the young generation and the upcoming youths/generation in our society. Future of our country depends upon these entire youth. These youth have to play an important role in the coming period. Positive and negative two thinking are present in human mind. Our young generation (youth) is also facing this problem. By positive thinking they help in the development of the nation/world and by negative thinking they create distortion of nation/world. For well working proper structure, guideline should be given to these youth.*

*Youth is the role player in this world, by generating new ideas, doing creative works etc. They play their role in different fields like in education, politics, towards society, in industrialization.*

## Responsibility Towards Education

Education is the basic (except food, cloth and shelter) need of every person. Education not only ends with collecting/having information related to particular field. Education itself has broad area like engineering, doctor, manager, accountant etc and these areas also have specification in different fields. This is the responsibility of youth that they get educated and play their role/responsibility.

Education as science help in the development of plants and machinery, industries layout and structure, nuclear power plants, micelle etc. Education as management helps in managing the available resources, well functioning of plant and machineries etc. education as an art include playing instruments, singing, cooking.

## Responsibility in The Field of Politics

Politics helps in running the country. By hearing the word politics the first word came to our mind is 'corruption'. There are certain rules, regulations, policies and procedures are made for export, import, investment, industrialization etc by these politicians.

## Responsibility Towards Society/ Family/ Nation

Family makes society and society makes nation. For family youth have to take care of his parents, family and support his family and try to fulfill their wishes. Every parent wants to see their child at good position with good reputation and handsome money. So that at old age their child will help them, But in place of helping today generation/ youth divide their property and make them out of home. Even the young generation use abuse words for them even sometimes they beat them/ fight with them. It is the duty of youth

to take care, help old peoples and spent time with them. But the situation is totally changed. In today's scenario young wants to live with their wife and child only. They busy in life as even they have not a second of time to spend with their parents.

Like responsibility of youth towards family, responsibility of youth towards society is important to make relation with all persons, help them in problem, spend time with them, and understand them, because the group of family makes society. So the involvement of one family member with other is important. In old generation/ scenario people have good relation with families, they always help each other and also spend time together. But now young generations do not have time to spend with other families. Everyone busy in their own life. Only rich person have relation with ricers and poor with poorer. In old generation before arising of the problem people stand together for help but now even In problem no one have time to help other. This is the drastic change in human being in this young generation. This is also the reason why young generation is not happy even they have all the facilities as compare to old generation.

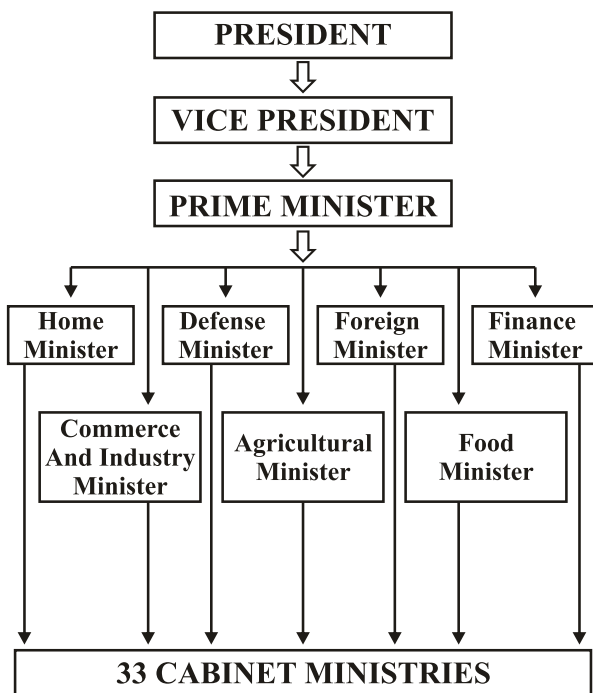

## Responsibility Towards Nation

Nation has so many directions in which development can be done. Industrial, politics, trade defense, agriculture, education. Politics are the main area to control nation. There 33 ministries in our cabinet to control the entire sector.

Now a day's youth are participating in all areas like defense, industry, banks, services, education, agriculture etc but not in politics. While all this sector gets controlled by politicians. Banking sector is

controlled by RBI and Government but all other sectors are controlled only by government like export and import are controlled by commerce and industry minister. So participation of youth in politics is very important. In today's scenario we can see maximum ministers are of old age. If these leaders get replaced by youngsters then the growth/development in overall direction will happen in our country. Politics is a centralized place to control the country. 33 cabinet ministries are the base to control the whole country.

Awareness of youth is very much important. As we can see corruption, smuggling, stealing, murder, rape etc are increasing. Mostly in stealing, rape, murder cases youths are involved and these things are increasing rapidly.

Youths are even doesn't know the value of money. In old age people use money safely, there is no wastage of money. But today youngsters are wasting the money. They don't know the value of Re1, they think it as low value/ cheap/ useless. But they don't know the combination of Re1 make Rs100. They spend this money on useless things. Price of petrol goes high but

they drive vehicles more than economy speed and also drive roughly. Selling of heavy cc bikes is more as compare to low cc bikes. This create current account deficit as import of petroleum goes high. Youth have awareness about it but instead of using low cc bikes they purchase heavy cc bikes. This is the casualness of youth towards the fiscal problem.

Proper guidance, right direction is important for youth as they don't know the importance of life. People between the ages of 14-22 years easily get addicted to wrong things. There is no ought Youths are very talented, they have capability to do anything in this world. As we speak about Kaplan Chawala and Osama b laden both are youth but one has used the mind in positive direction and another has used the in negative direction. If laden also gets proper guidance he will use his ability/ knowledge in positive direction and in help in growth of the world.

If talk about older times the persons like swami Vivekananda he gives a day lecture on '0'at Chicago. Chandrasekhar Azaad, Saheed Bhagat Singh and all extremists are youngsters who gave independency to India. They play their role towards nation, society and family. Later the persons have locality, honesty but these things are missing in our young generation and wrong activities like fraud, dishonesty, disobey towards family, society and nation is seeing.

Army man have to save country but some of them leek the information of army intelligence. Youngsters now a day disobey their parents. If we go for talent or intelligence it is more in young generation but instead of use they misuse these things. From all the information it is finally concluded that the current young generation have high intelligence, IQ level as compare to old generation. But instead of using they misuse it. Old generation are loyal, honest, obey, unite and they have maximum good qualities. But current young generation use to disobey, dishonest, disloyal and maximum bad qualities. So they need proper guidance for good development of their self, country, society and family too.
